# HOV Lanes on I-40

## NCDOT IS PLANNING FOR YOUR FUTURE

### What is HOV?

HOV lanes, sometimes called carpool lanes or diamond lanes, are reserved during designated times for vehicles with a minimum number of riders. These less congested lanes encourage people to carpool, vanpool or ride the bus to take advantage of faster travel times. HOV lanes manage traffic congestion by moving more people in fewer vehicles. HOV lanes provide highway users with travel choices as well as a faster, more reliable commute.

HOV lanes can reduce the stress and frustration often associated with the rush hour commute by taking you out of stop-and-go, bumper-to-bumper traffic. And if you are a passenger, you can read, catch up on your work or sleep. Best of all you don't have to watch others pass you by while you worry about making it to work on-time.

NCDOT and our study team is committed to keeping you involved in this study. We want to hear from you and appreciate your questions and comments. To assist in the exchange of information, we will have a series of newsletters and open houses. You can also learn more about this study by visiting our website or calling our toll free hotline. The web address and hot line number are shown below.

### ??Questions??
