Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. William Abernathy
75 Beech Glen Dr
Black Mountain, NC 28711-9746

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Judy Allen

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Carol Apperson

We have for too long pretended that we can do whatever we want to the earth with no negative consequences. In fact, it is absurd to pretend that it is safe or practical to just keep rebuilding infrastructure that repeatedly washes out. Sometimes you have to face hard facts.

Drew Joyner
1598 Mail Service Center
Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Nora B.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Continued development of Hatteras Island will only compound an already disastrous situation for to many people with a limited escape route during storms. To continue to spend and spend to support a tenuous life line is not economically sound. A reasonable approach for development restrictions will ease the already overburdened Route 12. Storms are always going to cause problems for the roadway and that is just a fact of nature. More and continued development will only worsen the situation. The seashore should be developed as a PUBLIC Conservancy for every one to enjoy far into the future.

Thank you,

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Donald Barker

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, wildlife, tourists and businesses.

The plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island and one that will not destroy crucial wildlife habitat.

Thank you,

Dr. Linda Sue Barnes

Dear Joyner,

NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

The plan to build the Phase I bridge and then elevate NC 12 still will not provide safe, reliable access, and it could destroy the refuge in the process. Elevation of Highway 12 onto a set of bridges, will turn the refuge into a constant construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please find funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras and the mainland or consider a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

Safe, reliable, long-term transportation option to Hatteras Island is the goal.

Thank you,

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Brandy Benz

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Dear Joyner,

Please do the moral thing which is to find a better alternative for Oregon Inlet

than building a bridge over it. I appeal to your commitment to protecting our natural habitats for our children, their children, and the tens of millions of animals who suffer when their habitats are destroyed.

Thank you for your serious and thoughtful consideration of the environmental damage that will result from this bridge project.

Anne Berkeleh

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Megan Best

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Jeff Bohan
900 Teague Rd

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Erin Brandon
5961 S Wilson Hill Rd
Mill Spring, NC 28756-7744

I recall the run-up to the present fine Asheville airport, in the area of my birth. At that time the ordinary citizens of Buncombe & surrounding counties were told the siting of a new airport would involve the leveling of the first such forest in the US, the one on the Biltmore Estate. When the citizenry voiced resounding opposition, suddenly 5 good alternative sites were pinpointed! So much for the wretched solution today being trotted out to permanently spoil and despoil the island now served by the Bonner Bridge. Back to the drawing board...or the ferry solution..

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Cathy Brunick

By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Patricia Burgert

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.
