Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. cyndy mace
6207 Robertson Pond Rd
Wendell, NC 27591-7919

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Whitney Martin

Dear Joyner,

Stop trying to maintain the naturally changing connection between the true islands of the outer banks in a very unnatural and costly manner.

I am fed up with subsidizing the wealthy populations playground and beach houses. The development of the ribbon of sand that connects the true islands is unsustainable and ill advised.

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Keely McCoye
5632 John Reep St
Morganton, NC 28655-9145

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. John McMichaels
221 E Hawfields Dr
Pittsboro, NC 27312-7107

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Susan Meredith

Drew Joyner
1598 Mail Service Center
Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island. We do not need to keep spending tax dollars on roads or bridges that WILL keep getting hit by storms that WILL wash them out and cause expensive damage. Any action or project that will destroy refuge or wildlife should not even be considered.

Thank you,

Mrs. Lesia Mills
PO Box 1183
Clayton, NC 27528-1183

By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island that does not endanger wildlife habitats.

Thank you,

Mr. Dustin Moore

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Hannah Morton
6121 Gum Branch Rd
Jacksonville, NC 28540-8764

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. George Neste
4437 Garden Club St
High Point, NC 27265-1196

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island that does not jeopardize the wildlife refuge and its inhabitants. Wildlife are an important part of North Carolina's natural resources!

Thank you,

Ms. Julie Blume Nye

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Nancy Orban
