Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mrs. Evelyn Paddison
8003 Rockbury Rd

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island. Hatteras is such a unique and special place, please do not ruin it by destroying any turtle hatching area, or any other area. I am unable to visit there now, but have loved it since the first time was privileged to visit there. Please maintain it for others to not only enjoy, but to appreciate. Thank you.

Thank you,

Mrs. Betty Pearce

That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Harry Petrequin

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Diana Pinckney

I own a rental home in Nags Head. Year after year renters comment on the wonderful natural resources including Pea Island. Tourism is a major force impacting the Dare and Hyde economies. Don't put that in jeopardy.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Stephen Preston
2000 New River Inlet Rd Unit 3206
N Topsail Beach, NC 28460-8585

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Hosea Ray
703 Kooler Cir
Fayetteville, NC 28305-4503

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Mr. Carl Ricciardelli

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Melissa Robins

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat. We have already done enough to destroy much of our precious wildlife habitat and not enough to protect and preserve our incredible wildlife in this great state! The unique and intriguing wildlife in our Tar Heel state is a considerable attraction to many who come to visit here and for those who are fortunate to reside in North Carolina

I urge you to strongly consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

I am asking you to please find a better way to provide transportation in the Oregon Inlet other than the bridge that is now being considered.

I thank you in advance for listening and hopefully finding a better solution to this problem that will preserve the wildlife and their habitat in that area!

Thank you,

Ms. Stephanie Rodelander

Raleigh, NC 27699

Dear Joyner,

With the frequent storm washouts and past two years of hurricane damage to NC Highway 12 north of Rodanthe, it is clearer than ever that NCDOT's plan to continue relying on NC 12 for its Bonner Bridge replacement plan fails to provide a reliable, long-term solution for Hatteras residents, tourists and businesses.

I do not agree with the plan to build the Phase I bridge and then elevate NC 12 onto Phase II bridges. That plan will not provide safe, reliable access, and it could destroy the refuge in the process. By elevating Highway 12 onto a series of bridges, the agencies will turn the refuge into a continual construction zone, ruin the view of the refuge and destroy wildlife habitat.

Please consider using funds from discontinued or unnecessary NCDOT projects to pay for a more stable, long-term connection between Hatteras Island and the mainland that would better serve residents, tourists, taxpayers and wildlife alike. Possible solutions could include a long bridge through the Pamlico Sound that avoids the section of the island prone to washout, or a system of high-speed ferries.

We need a safe, reliable, long-term transportation option to Hatteras Island.

Thank you,

Ms. Patricia Rosati
4263 Nc Highway 751
Apex, NC 27523-5693

Do not build anything at all in the wildlife refuge. The wildlife needs to be conserved, and not messed with at all.

Thank you,
